

SECTION 1194.21 Criteria	Supporting Features	Remarks / Explanation
<p>(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.</p>	<p>Supports</p>	<p>Warpwire aims to have all of its website and software accessible and navigable by keyboard.</p>
<p>(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.</p>	<p>Supports</p>	<p>Warpwire does not interfere with any operating system or browser shortcuts. Accessibility features are not disabled or altered by Warpwire.</p>
<p>(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.</p>	<p>Supports</p>	<p>Where possible, Warpwire uses default browser focus styles. Where those styles are overridden, Warpwire provides distinct focus styles.</p>
<p>(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.</p>	<p>Supports</p>	<p>Provided by the browser.</p>

SECTION 1194.21 Criteria	Supporting Features	Remarks / Explanation
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Supports	Warpwire uses icons to help depict the purpose of certain interface elements, such as a magnifying glass to represent the Find button on mobile. The use of these icons is consistent throughout the site. Alternate text is used to allow screen readers to read the purpose of the link/button to the user.
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Supports	Provided by the browser.
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Supports	Warpwire never overrides these user settings.
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Supports	Warpwire uses minimal animation.
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Supports	Warpwire always pairs colors with a textual description to distinguish the importance of a visual element.

SECTION 1194.21 Criteria	Supporting Features	Remarks / Explanation
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Supports	Warpwire does not have user adjustable color settings. Warpwire's default color scheme have been designed to allow for optimal constrast perspective.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Supports	Warpwire does not use flashing or blinking text.
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Supports	Warpwire and all forms work well with screen readers such as JAWS or VoiceOver.

SECTION 1194.22 Criteria	Supporting Features	Remarks / Explanation
<p>(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).</p>	<p>Supports, with exceptions</p>	<p>Meaningful images in the Warpwire user interface have alt-text descriptions. Users upload their own content and are responsible for ensuring the accessibility of the uploaded content.</p>
<p>(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.</p>	<p>Supports, with exceptions</p>	<p>Warpwire does not contain built-in multimedia presentations. Users upload their own content and are responsible for ensuring the accessibility of the uploaded content.</p>
<p>(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.</p>	<p>Supports</p>	<p>Warpwire does not use color alone to distinguish the importance of a visual element</p>
<p>(d) Documents shall be organized so they are readable without requiring an associated style sheet.</p>	<p>Supports</p>	<p>With style sheets disabled, both users and screen readers can read documents.</p>

SECTION 1194.22 Criteria	Supporting Features	Remarks / Explanation
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not Applicable	Warpwire does not use server-side image maps.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Not Applicable	Warpwire does not use server-side image maps.
(g) Row and column headers shall be identified for data tables.	Supports	
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Not Applicable	Warpwire has no data tables with two or more logical levels of row or column headers.
(i) Frames shall be titled with text that facilitates frame identification and navigation	Not Applicable	
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Supports	Warpwire does not cause the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.

SECTION 1194.22 Criteria	Supporting Features	Remarks / Explanation
<p>(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.</p>	Supports	Warpwire is compliant with all provisions of this section.
<p>(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.</p>	Limited support	Warpwire is compliant with newer versions of Assistive Technologies that support dynamic content generation.

SECTION 1194.22 Criteria	Supporting Features	Remarks / Explanation
<p>(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).</p>	<p>Supports</p>	<p>Warpwire does not require any applet or plug-in to work with its default functionality. Users can capture their own multimedia content using Flash, but if users do not have Flash installed on their computer, they will be prompted with a link to download Flash.</p>
<p>(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Supports</p>	<p>Warpwire and all forms in the application work with screen readers such as JAWS, NVDA or VoiceOver.</p>
<p>(o) A method shall be provided that permits users to skip repetitive navigation links.</p>	<p>Supports</p>	

SECTION 1194.22 Criteria	Supporting Features	Remarks / Explanation
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Not Applicable	Warpwire doesn't utilize timed responses.

Section 1194.23 Telecommunications Products - Not Applicable

SECTION 1194.24 Criteria	Supporting Features	Remarks / Explanation
<p>a) All analog television displays 13 inches and larger, and computer equipment that includes analog television receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals. As soon as practicable, but not later than July 1, 2002, widescreen digital television (DTV) displays measuring at least 7.8 inches vertically, DTV sets with conventional displays measuring at least 13 inches vertically, and standalone DTV tuners, whether or not they are marketed with display screens, and computer equipment that includes DTV receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cabl</p>	<p>Not Applicable</p>	
<p>(b) Television tuners, including tuner cards for use in computers, shall be equipped with secondary audio program playback circuitry.</p>	<p>Not Applicable</p>	
<p>(c) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain speech or other audio information necessary for the comprehension of the content, shall be open or closed captioned.</p>	<p>Supports</p>	<p>All of Warpwire's support videos have closed captioning.</p>

SECTION 1194.24 Criteria	Supporting Features	Remarks / Explanation
(d) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain visual information necessary for the comprehension of the content, shall be audio described.	Supports, with exceptions	All of Warpwire's support videos have audio tracks, though the audio may not fully represent every element of the video.
(e) Display or presentation of alternate text presentation or audio descriptions shall be user-selectable unless permanent.	Supports	Closed captioning can be toggled on and off at the user's discretion.

Section 1194.25 Self-Contained, Closed Products - Not Applicable

Section 1194.26 Desktop and Portable - Not Applicable

SECTION 1194.31 Criteria	Supporting Features	Remarks / Explanation
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Supports	Warpwire works well with screen readers such as JAWS or VoiceOver.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	Supports	Warpwire supports screen magnification and browser-provided zoom functionality
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided.	Supports	Warpwire does not require hearing for operation. Video files uploaded to Warpwire support closed captioning. Users can upload their own content and are responsible for ensuring the accessibility of the uploaded content.
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Supports	No part of Warpwire's default operation requires the use of audio. Users can upload their own content and are responsible for ensuring the accessibility of the uploaded content.
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	Supports	No part of Warpwire's default operation requires user speech.

SECTION 1194.31 Criteria	Supporting Features	Remarks / Explanation
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	Supports	Warpwire does not require fine motor control of simultaneous actions. Additionally, Warpwire is accessible via keyboard.

SECTION 1194.41 Criteria	Supporting Features	Remarks / Explanation
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge	Supports	Text based HTML support documentation is available at http://warpwire.com/support . All Warpwire support videos have closed captioning.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supports	
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supports	Text based HTML support documentation is available at http://warpwire.com/support . All Warpwire support videos have closed captioning.
